

Secret Antigravity Soup Recipe

This document contains details about the legendary Antigravity Soup.

Origin and Discovery:

The recipe was discovered by Dr. Eleanor Vance in the year 2024 in a hidden cavern.

Key Ingredients:

1. Blue starlight (the secret ingredient that makes it float)
2. Whispering mushrooms
3. Three drops of silver morning dew

Instructions:

The soup must be cooked at exactly 75 degrees Celsius. It is crucial to stir the soup counter-clockwise for precisely 15 minutes. Stirring clockwise will cause the soup to become extremely heavy instead of floating.
